
Granite
UC-03 Run a workflow task
with an optional injected fault
«include»
UC-06 Analyse the run
checks, findings, hypotheses
UC-05 Inspect a run
graph, steps, check results
UC-07 Investigate a finding
ranked origin hypotheses
UC-08 Verify a hypothesis
controlled replay, verdict
Planned for later milestones
UC-01/02 configure, edit checks
UC-04 import a trace · UC-10 suggest a fix
UC-13/14 benchmark, evaluation
UC-15 SDK · UC-16/17 reuse, administer
UC-09 Review a finding
accept, reject, ask for information
«extend»
UC-11 Export a report
Markdown and JSON
UC-12 Browse and search history
filters by severity and level
Analyst
Language model
Mid-1 scope
Solid use cases are implemented and tested. The reviewer and the developer are the same person at this stage (no accounts yet).
